

MAY NEWSLETTER

PRE-PRIMARY 1

Dear parents

Thank you for your participation in making International Day a success! The children did a great job on their posters and we thank you for sharing all of the delicious dishes.

The progress each child has made in my classroom is truly AMAZING! Even though all the children develop at their own pace, each child has shown tremendous progress in all areas of the classroom!

May's Theme: Nature/Spring (butterflies, insects, flowers, reptiles)

Language: We will continue to review and practice handwriting skills and letter sounds. The older students will keep working on blending sounds, compound words, sight words, and rhyming.

Math: We will review all of the lessons we learned throughout the year and the older students will be introduced to subtraction.

Science: This month, the children will learn about spring and nature including parts of the butterfly, the life cycle of a lady bug and bumble bee, parts of the flower, and parts of the caterpillar. They will also learn about reptiles and amphibians.

Art: We will be creating many nature inspired crafts including a caterpillar crumble paper art, paper plate basket with flowers, fingerprint lady bug, snail craft, and a nature themed picture frame.

We are very proud of the success your child has made during the school year. Continuing to practice the skills they learned at school over the summer will reinforce your child's growth in their learning!

Reminders:

- **Muffins with Mom:** May 10th @ 8:30 - 9:30 a.m.
- **Donuts with Dad:** May 17th @ 8:30 - 9:30 a.m.
